

# COVID-19 STUDIES

## for outpatients w/coronavirus and their close contacts

**Have you recently been diagnosed with SARS-CoV-2 infection in northeast Ohio, or been in close contact with someone who has? You may be eligible to join a research study at Case Western Reserve University / University Hospitals to look at how the immune system responds to exposure and/or infection by SARS-CoV-2. Blood, oral, nasal and saliva samples will be taken. The study is for adults (18+), who must enroll into the study within 10 days of a positive**

**coronavirus test, or within 10 days of being in close contact with someone diagnosed with SARS-CoV-2. Compensation is provided.**

**To find out more and inquire about enrolling, please contact us at 216-844-4444 or [covid19research@uhhospitals.org](mailto:covid19research@uhhospitals.org).**
